| SOFTWARE ARCHITECTURE AND DESIGN PATTERNS <br> [As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2016 -2017) SEMESTER - VII |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Subject Code | 15IS7 | IA Marks | 20 |  |
| Number of Lecture Hours/Week | 4 | Exam Mark | 80 |  |
| Total Number of Lecture Hours | 50 | Exam Hours | 03 |  |
| CREDITS - 04 |  |  |  |  |
| Course objectives: This course will enable students |  |  |  |  |
| - Learn How to add functionality to designs while minimizing complexity. <br> - What code qualities are required to maintain to keep code flexible? <br> - To Understand the common design patterns. <br> - To explore the appropriate patterns for design problems |  |  |  |  |
| Module - 1  <br> Introduction: what is a design pattern? describing design patterns, the catalog of  |  |  |  | Teaching Hours |
| Introduction: what is a design pattern? describing design patterns, the catalog of design pattern, organizing the catalog, how design patterns solve design problems, how to select a design pattern, how to use a design pattern. What is object-oriented development?, key concepts of object oriented design other related concepts, benefits and drawbacks of the paradigm |  |  |  | 10 Hours |
| Module - 2 |  |  |  |  |
| Analysis a System: overview of the analysis phase, stage 1: gathering the requirements functional requirements specification, defining conceptual classes and relationships, using the knowledge of the domain. Design and Implementation, discussions and further reading. |  |  |  | 10 Hours |
| Module - 3 |  |  |  |  |
| Design Pattern Catalog: Structural patterns, Adapter, bridge, composite, decorator, facade, flyweight, proxy. |  |  |  | 10 Hours |
| Module - 4 |  |  |  |  |
| Interactive systems and the MVC architecture: Introduction , The MVC architectural pattern, analyzing a simple drawing program , designing the system, designing of the subsystems, getting into implementation, implementing undo operation , drawing incomplete items, adding a new feature, pattern based solutions. |  |  |  | 10 Hours |
| Module - 5 |  |  |  |  |
| Designing with Distributed Objects: Client server system, java remote method invocation, implementing an object oriented system on the web (discussions and further reading) a note on input and output, selection statements, loops arrays. |  |  |  | 10 Hours |
| Course outcomes: The students should be able to: |  |  |  |  |
| - Design and implement codes with higher performance and lower complexity <br> - Be aware of code qualities needed to keep code flexible <br> - Experience core design principles and be able to assess the quality of a design with respect to these principles. <br> - Capable of applying these principles in the design of object oriented systems. <br> - Demonstrate an understanding of a range of design patterns. Be capable of comprehending a design presented using this vocabulary. <br> - Be able to select and apply suitable patterns in specific contexts |  |  |  |  |
| Question paper pattern: |  |  |  |  |

The question paper will have ten questions.
There will be 2 questions from each module.
Each question will have questions covering all the topics under a module.
The students will have to answer 5 full questions, selecting one full question from each module.

Text Books:

1. Object-oriented analysis, design and implementation, brahma dathan, sarnath rammath, universities press,2013
2. Design patterns, erich gamma, Richard helan, Ralph johman , john vlissides ,PEARSON Publication,2013.

## Reference Books:

1. Frank Bachmann, RegineMeunier, Hans Rohnert "Patter n Oriented Software Architecture"-Volume 1, 1996.
2. William J Brown et al., "Anti-Patterns: Refactoring Software, Architectures and Projects in Crisis", John Wiley, 1998.
